THIN METAL PARTS HIRES NEW PRODUCT MARKETING MANAGER

Jeremy Hancock rounds out staff at new Colorado Springs facility

COLORADO SPRINGS, Colorado – April 21, 2008 – [Thin Metal Parts](#) (TMP) recently hired Jeremy Hancock as product marketing manager, completing the management team for TMP's new facility in Colorado Springs. In his new position, Hancock will focus on increasing the market presence for TMP's expanding product capabilities, through industry research, target account identification and prospect/account analyses.

Jeremy Hancock, TMP product marketing manager

"Jeremy has a solid grasp on the industry and is well-equipped to contribute to the fast-paced, innovative environment at Thin Metal Parts," says Craig Spitzfaden, president of Thin Metal Parts. "He is an excellent addition to our staff, as his experience completes our marketing team."

Prior to joining Thin Metal Parts, Hancock worked as product development manager for Nomadic Display. With other positions at companies such as Explus Inc. and Stihl Inc., Hancock has wide-ranging experience in both product development and marketing management.

Thin Metal Parts recently moved into a new facility, located at 4733 Centennial Boulevard in Colorado Springs. The larger space allows TMP to expand its product offering, as well as services and capabilities. For more information on Thin Metal Parts, please visit www.thinmetalparts.com or call 719-268-8300.

Thin Metal Parts

Thin Metals Parts (TMP), based in Colorado Springs, is a world leader in the manufacture of high-precision, very thin metal, glass and Mylar™ products. The product line was started in 1985, and TMP became an independent company in 2002. Thin Metal Parts now serves a broad industry base and offers a full range of manufacturing capabilities including electroforming, chemical etching and laser cutting. The company also has full-service photo-tooling capabilities with the highest plotting resolution and accuracy available in the industry.

In addition to rapid quotes and turnaround time, Thin Metal Parts provides full-service application support and customized solutions to fit the needs of each customer. The company's products are ideal for applications in the medical, automotive, microwave, office and industrial automation, aerospace, consumer products and electronics industries. For more information, please visit www.thinmetalparts.com or call 719-268-8300.
